graphic user interface

Commet's graphical interface is designed to be intuitive and easy to use. It is made up of several key elements that enable users to navigate efficiently and exploit all the functionalities offered by the application.

comment something

Posting a Comment

- **Title:** In the field labeled “Enter your title here,” input the title of your comment. This field is mandatory to help other users quickly understand the subject of your comment.
- **Resource Link:** You can add a link to the article or post you're referring to in the "Link to resource" field. This allows other users to easily access this resource to find out more.
- **Description:** The “Description (optional)” field allows you to add more details to your comment. Although this field is optional, a detailed description can help other users understand your viewpoint.
- Once you have filled in the necessary fields, click on the “Post” button to publish your comment. Your comment will then be visible to all users of the application.

graphic user interface

Commet's graphical interface is designed to be intuitive and easy to use. It is made up of several key elements that enable users to navigate efficiently and exploit all the functionalities offered by the application.

Navigation Bar

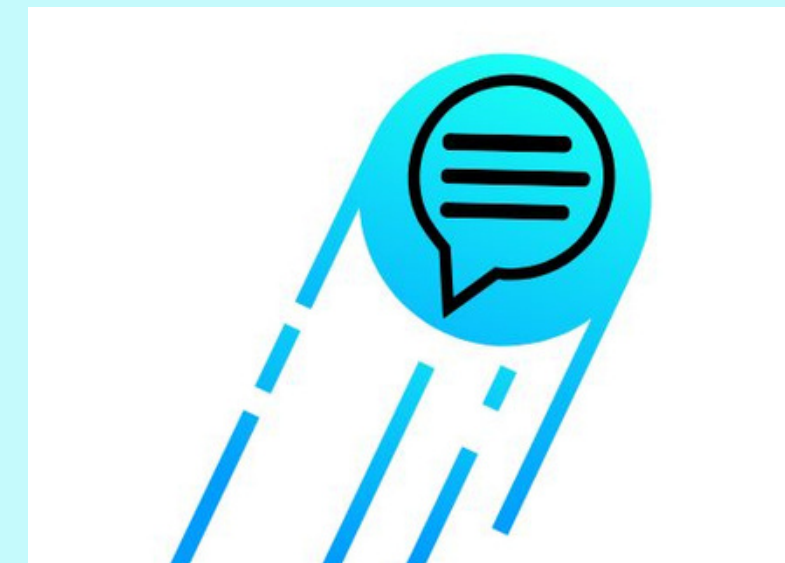

Dashboard

Sidebar Menu

Main Content Area

Toolbar

Notification Windows

Navigation Bar

- Located at the top of the screen, this bar provides quick access to different sections of the application, such as the home, settings, and help.

Dashboard

- An interactive overview where you can view key data and real-time statistics.

Sidebar Menu

- A collapsible menu on the left side of the screen that offers quick access to secondary features and advanced settings.

Main Content Area

- The central part of the interface where the primary information and tools are displayed.

Toolbar

- Located at the top of the main content area, it offers shortcuts to common actions and important features.

Notification Windows

- A dedicated area for system alerts and notifications.

features

Commet offers a comprehensive range of features designed to meet user needs and enhance their experience. Here is a description of the main features available:

01

Comment Viewing

This feature allows users to browse and view all comments made by other users within your application. It enhances user engagement by providing a comprehensive overview of discussions and user interactions.

02

Manage comments

Users can edit or delete their own comments.

03

Reply to comments

Users can reply directly to other comments, facilitating interaction between them.

features

Commet offers a comprehensive range of features designed to meet user needs and enhance their experience. Here is a description of the main features available:

04

Reply to coments of comments

This feature allows users to engage in nested discussions by responding directly to replies of comments, enhancing the depth and context of conversations within your application.

05

Comment on online content

Users can leave comments on any online publication by referencing the publication's link in a post on commet.

06

Registration and log-in

User and administrator management is integrated, enabling registration, log-in and account management.

COMMET

Frequently asked questions

Q: How can I retrieve my password if I've forgotten it?

A: Use the password reset function on the login page.

Q: Can I comment on copyrighted content?

A: You must respect the copyright and content policies of each site.
Make sure your comments do not violate these rules.

Q : How do I report an inappropriate comment?

A: Click on the "Report" button next to the comment in question and follow the instructions
